1. Limited Product Warranty

SUNMAN warrants that its photovoltaic modules together with the DC connector cable assemblies are free from defects, if any, in materials and workmanship under normal application, use, installation and service conditions for a period of pending 144 months from the delivery (Incoterms 2010) of SUNMAN Modules to the Customer, or 12 months after the date of production of the Modules as indicated in the serial number, whichever date is earlier. If Modules become malfunction or inoperative due to defect in material or workmanship during such pending 144 months period set forth above, SUNMAN will, at its own option, either repair or replace the Modules in problem, or refund a reasonable portion of the purchase price as paid by the Customer (“Purchase Price”). The repair or replacement or refund remedy shall be the sole and exclusive remedy provided under this Limited Warranty.

2. Limited Peak Power Warranty and Limited Remedy

SUNMAN warrants the percentage of nominal power output as below:

A. For Monocrystalline Modules, 98% in the first year, thereafter, for years two (2) through twenty-five

(25), 0.55% maximum decrease from Module's nominal power output per year, ending with the 84.8% in the 25th year after the Warranty Start Date.

NOTE: "nominal power output" is the power in watt peak that a PV-module generates in its maximum power point. SUNMAN measurements are as follows (a) light spectrum of AM 1.5, (b) an irradiation of 1,000W per m² and (c) a cell temperature of 25 degree Centigrade. The measurements are carried out in accordance with IEC61215 as tested at the junction box terminals per the calibration and testing standards of SUNMAN valid at the date of manufacture of the PV-Modules. SUNMAN's calibration standards shall be in compliance with the standards applied by international institutions accredited for this purpose.

B. SUNMAN warrants each Module against defects in materials and workmanship that result in the failure of the Modules to produce the warranted percentage specified above of the nominal power output for the Module set forth in SUNMAN's product datasheet. If SUNMAN determines in its discretion that any Module is not providing the warranted percentage of the nominal power output due to Modules' defects in material or workmanship attributed to SUNMAN, who will, at its sole option and discretion, either [1] make up such loss in power by providing to Customer additional Modules; or [2] repair or replace the defective Modules including free shipping to the place supplied by SUNMAN; or [3] refund Customer such loss proportion arising from unqualified power output which less than the warranted percentage of the nominal power.

The remedies set forth in Section 2 are the sole and exclusive remedies provided under the limited minimum Peak Power Warranty.
